**Re: Petitions Regarding the Use of Signal Boosters and Other Signal
Amplification Techniques Used With Wireless Services,
WT Docket No. 10-4**

Dear Ms. Dortch:

On November 19, 2010 Christopher Guttman-McCabe, Vice President, Regulatory Affairs and Brian Josef, Director, Regulatory Affairs, CTIA-The Wireless Association®, along with Jeanine Poltronieri, AT&T, Brian Fontes, National Emergency Number Association, Richard Engelman, Sprint Nextel, Steve Sharkey, T-Mobile, and Andy Lachance and Tamara Preiss, Verizon Wireless met with Ruth Milkman, Roger Noel, Michael McKenzie, Joyce Jones and Tom Peters, all from the Wireless Telecommunications Bureau. The above-listed parties discussed the ongoing proceeding regarding the use of signal boosters and other signal amplification techniques for wireless services.

During the meeting, the parties highlighted the increasing incidents of harmful interference to commercial and Public Safety wireless networks caused by the unauthorized operation of signal boosters. The parties reiterated their support for FCC action affirming and enforcing the requirement in its rules that a FCC license, or express licensee consent, is necessary to operate a signal booster. They also raised important considerations to be addressed when evaluating technical and operational features for boosters.

Pursuant to Section 1.1206 of the Commission's Rules, this letter is being electronically filed with your office. If you have any questions regarding this submission, please contact the undersigned.

Sincerely,

/s/ Brian M. Josef
